FREEGENDOC / REPRODUCIBLE EXAMPLE

PDF/A validation demo

A one-page document with no personal information.

Purpose

Compare an ordinary PDF with a PDF/A-2b export of the same page.
The accompanying veraPDF reports identify the files checked.

Reproduce the check

Use veraPDF with the PDF/A-2b profile for each file.
Compare the report result, file hash and software version.

Scope

This is an independently generated demonstration.
It is not an export from FreeGenDoc document generators.
A successful check applies to the specific file and profile only.
